About the Data

This publication provides a data source for Alberta's international trade, and is intended to provide businesses with information on current export markets.

A profile is included for each country that imported over $10 million worth of Alberta's goods in 2002. Each profile lists the top 15 commodities Alberta exported to that country and also compares them with Canadian exports. A summary of export totals to all countries is included in Appendix B.

The trade commodity nomenclature used is the Harmonized Commodity Description and Coding System (Harmonized System or HS), adopted by Statistics Canada in 1988.

Exports by geographic region, industry, and commodity are also provided in the following sections. Industry Canada's regional groups are used. Industry groupings are based on Statistics Canada's publication on concordance between export commodity and industry classifications (see Appendix A).

For the purposes of this publication, six-digit HS codes are presented in the country profile tables. For simplicity, some commodity descriptions accompanying these codes have been revised from their standard format. Readers requiring the exact content of a particular HS number are referred to the Customs Tariff Schedule of Canada.

Statistics Canada is the main source of information for the publication. Estimates for commercial and transportation service exports are developed by Alberta Economic Development and are based on special surveys conducted by Statistics Canada. The informational captions appearing at the top right corner of each country profile are from *World Factbook 2002*. The term "nes" refers to "not elsewhere specified."

The term "exports" refers to "domestic exports," goods grown, extracted or manufactured in Canada. The term includes goods of foreign origin, which have been materially transformed in Canada and then re-exported.

Unfortunately, service exports cannot be included on a country specific basis since these data are not presently available. However, these exports, including travel and tourism, have been provided in the "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

The Year in Review

Lower prices main cause of 12.4% drop in Alberta's international exports

Alberta exported $55.0 billion worth of goods and services to more than 170 countries in 2002. This total includes $49.1 billion in commodity exports and $5.9 billion in service exports. Exports of goods and services declined by 12.4% in 2002, from $62.8 billion in 2001. Canadian exports of goods and services fell by 1.6% in 2002, the second consecutive year of declines.

Commodity Exports

The value of commodity exports fell by 13.7% from $56.9 billion in 2001 to $49.1 billion in 2002. Of the 178 countries Alberta exported to, the top markets were the United States, Japan and China. The United States imported $43.4 billion worth of goods, Japan $1.2 billion and China $738 million.

The main cause of Alberta's drop in exports was lower commodity prices, particularly for natural gas and chemicals. To a lesser degree, lower volumes of primary agricultural products and telecommunication equipment also played a role – overall commodity export volumes declined by just over 1% in 2002.

The decline in Alberta exports was partly the result of the global economic slowdown. On a global scale, the manufacturing sector was in a recession in 2001 and remained weak in 2002, with output in the Information and Communication Technology sector falling for a second year in a row. This negatively affected Alberta's exports of telecom equipment, and also led to declines for many other manufacturing sectors. The events of September 11 and the uncertainty about the pending war in Iraq further aggravated the situation, impacting world trade in both goods and services. After peaking in 2000 with growth of more than 12%, world trade volumes declined marginally in 2001 and grew a weak 3% in 2002.

The supply of primary agricultural products to world markets was constrained as a result of two consecutive years of drought in Alberta, which resulted in sharp reductions in export volumes of grains, oilseeds and pulse crops (such as peas).

Regionally, Alberta's major markets were the United States, Asia and Western Europe. The US accounted for 88.5% of total commodity exports, Asia for 6.4% and Western Europe for 1.9%. Exports to most regions, especially the US, the Middle East and South America, were lower than in 2001, while exports to Africa and Oceania increased. Exports to the US declined by 14.2% to $43.4 billion, to Asia by 7.6% to $3.1 billion, and to Western Europe by 7.0% to $924 million.

Commodity exports can be classified into three sectors: mining and energy, primary agriculture, and manufacturing. The mining and energy sector accounted for the majority of exports at $30.5 billion, followed by the manufacturing sector at $15.5 billion and primary agriculture at $2.2 billion. In 2002, exports increased in all three sectors, with mining and energy down 16.2%, manufacturing down 7.2% and primary agriculture down 22.8%.

Service Exports

Service exports were estimated at $5.9 billion in 2002, the same as in 2001. Included in this figure are $1.5 billion in international travel and tourism receipts and $4.4 billion in exports of commercial and transportation services. Service exports were influenced by the events of September 11, uncertainty about the war in Iraq and the possibility of further terrorist attacks.

Unlike commodity exports, services cannot be included on a country specific basis. Therefore, unless otherwise specified, the term "export" in the remainder of this publication will refer strictly to commodities.

Market Influences

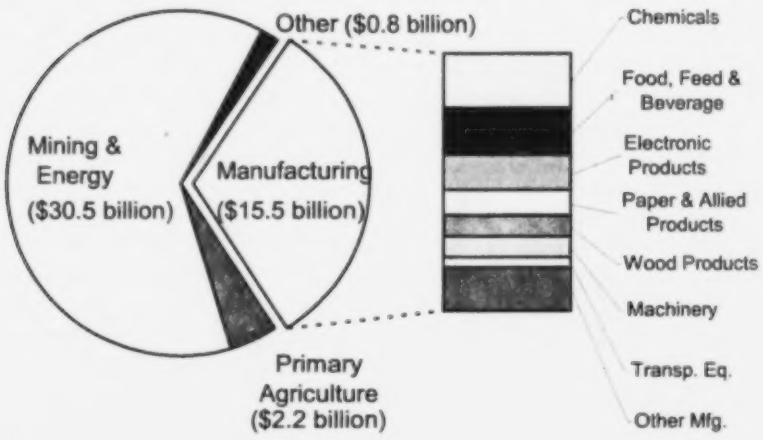
Some of the factors that influenced Alberta's 2002 trade include:

- weak world economic growth causing a small increase in world trade volumes
- the euro region (European Union) on the brink of recession by year-end
- global tourism and aviation industries continue to suffer
- declining stock markets
- very low business and consumer confidence, especially by year-end
- continued weakness in Japan
- a recession in Latin America
- another dismal year for the global manufacturing industry and high tech sector
- strong US and euro currencies (relative to the Canadian dollar)
- the events of September 11 and uncertainty about the war in Iraq
- low supply of Alberta grains and oilseeds because of two years of drought
- lower natural gas prices in the first half of 2002
- weak prices for petro-chemicals and wood products
- the US - Canada lumber dispute

Alberta Exports by Industry

Global economic slowdown, drought and lower prices influence Alberta goods exports

The value of Alberta's commodity exports in 2002 was $49.1 billion, a decline of 13.7% from 2001. The decrease is largely due to lower prices for gas and gas liquids (in the first half of 2002) and for chemicals, and reduced export volumes of primary agricultural products (caused by two years of drought). 2002's decline was also partly the result of the global economic slowdown. The global manufacturing industry, and the Information and Communication Technology (ICT) products sector in particular, entered a recession in 2001 and remained weak in 2002.



Alberta's commodity exports are divided into three main sectors: mining, manufacturing and primary agriculture. The mining sector accounted for $30.5 billion (62%) of Alberta's commodity exports. This consisted primarily of natural gas and crude petroleum at $16.2 billion and $12.7 billion, respectively. Mining exports were 16% lower than in 2001, primarily as a result of lower prices for natural gas and gas liquids during the first half of 2002.

The manufacturing sector accounted for $15.5 billion in exports, a decline of 7.2% from 2001. It was adversely affected by the continued weakness in the global manufacturing sector, as well as lower prices for chemicals. Exports of computer and electronic products (mainly telecom equipment) fell by 20%, of refined petroleum products by 16% and of chemicals by 9%. Strong performances were recorded by primary metals (up 34%), and by plastics (up 6%).

Primary agricultural exports totaled $2.2 billion in 2002, a drop of 23% from 2001. Exports of crops and livestock fell by 27% and 12%, respectively. The decline in crops was caused by a lack of supply in Alberta because of two consecutive years of drought. Exports of canola and wheat fell 32%, and of barley 50%, but durum wheat exports rose 14% as the main durum growing areas were less affected by the 2002 drought. Exports of peas plummeted. Live cattle exports declined by 11% as a result of lower prices, while hog exports fell 43%, because of lower volumes and lower prices.

Alberta Exports by Industry, 1997 to 2002

	($ millions)						Percent Change	Percent Change

1 Estimate.

Agriculture, Food and Beverages

Two years of drought cause sharp decline in agricultural exports

The combined export value of primary agriculture and food and beverages (agri-foods) was $5.1 billion in 2002. Primary agricultural exports fell 22.8% to $2.2 billion, as two consecutive drought years lowered crop production. Exports of food and beverages declined 5.9% to $2.8 billion. The leading agri-food exports were beef products at $1.6 billion, wheat (including durum wheat) at $845 million, and cattle at $637 million.

Beef exports declined by 4.4% to $1.6 billion on lower prices alone – export volumes rose slightly because of strong US demand. Pork exports fell 11% to $196 million, mostly because of lower prices. Exports of vegetable fats and oils, such as canola oil, cake and meal, fell by 29% to $194 million, because of a very large decline in export volumes to the US. Frozen food shipments (mainly potato products) rose 4.9% because of increased volumes shipped to Japan.

Sharply reduced export volumes caused a 39% drop in the value of wheat and canola exports, to $667 million and $315 million, respectively. Wheat exports to Iran, the top importer of Alberta wheat in 2001, plummeted, and exports of wheat, barley and canola to China were also sharply lower. Japan increased its imports of Alberta wheat and canola. Large increases in volumes shipped to Algeria and Tunisia caused a 14% rise in durum wheat. Live cattle exports to the US declined by 11% to $637 million, because of lower prices.

Alberta's Major Agricultural Exports
(including Food & Beverage Manufacturing)

	2001 ($ '000)	2002 ($ '000)	Percent Change
Beef products	1,721,794	1,646,343	-4.4%
Wheat, including durum wheat	1,134,802	844,893	-25.5%
Cattle, live (includes bison)	712,690	636,726	-10.7%
Oil seeds (canola, mustard seed, flaxseed)	458,914	330,898	-27.9%
Pork products	220,758	196,021	-11.2%
Vegetable fats & oils (e.g. canola oil & cake)	275,731	194,379	-29.5%
Frozen foods (potatoes)	158,519	166,321	4.9%
Malt & flour milling	149,257	155,339	4.1%
Raw hides & skins	120,810	125,602	4.0%
Forage products (hay, alfalfa)	80,692	95,555	18.4%
Other grains (barley, oats)	159,714	91,249	-42.9%
Swine, live	123,670	75,728	-38.8%
Peas & beans	140,452	48,972	-65.1%
Total Above	**5,457,803**	**4,608,026**	**-15.6%**
TOTAL AGRICULTURE, FOOD & BEVERAGES	**5,932,007**	**5,092,368**	**-14.2%**

About 60% of agri-food exports went to the United States ($3.0 billion), mostly in the form of beef products ($1.3 billion) and cattle ($637 million). Other major agri-food markets were Japan and Mexico at $745 million and $346 million, respectively.

Mining

Natural gas exports fall by one quarter because of lower prices

Mining exports in 2002 were valued at $30.5 billion compared to $36.4 billion the year before. Major factors behind this 16.2% decline were a $5.8 billion decrease in the value of natural gas, as prices were substantially lower in the first half of 2002 than in the corresponding period of 2001, and to a lesser degree a significant drop in electricity exports.

The 25% drop in the value of gas exports occurred solely because of lower prices (down 27%) as volumes shipped increased by about 1%. Crude oil increased marginally by 0.3% as a result of a slight price rise. Although volumes rose strongly by 30%, liquefied petroleum gas exports declined by 12% because of much lower prices.

A 30% decline in coal exports during 2002 was caused by lower volumes, especially to South Korea, Japan and the US. The major coal markets were Japan ($96 million), South Korea ($45 million) and Brazil ($30 million).

California's electricity crisis turned Alberta into an exporter of electricity in the first half of 2001, but electricity exports dropped sharply in 2002 to only $9 million, down from $204 million in 2001.

Sulphur exports were up 7.5% in 2002 on higher prices.

Alberta's Major Mining Exports

	2001 ($ '000)	2002 ($ '000)	Percent Change
Natural gas	21,684,032	16,193,000	-25.3%
Crude petroleum	12,627,012	12,666,297	0.3%
Petroleum gases, liquefied:	1,360,850	1,195,506	-12.2%
Propane, liquefied	*1,141,380*	*925,145*	*-18.9%*
Butanes, liquefied	*121,285*	*137,465*	*13.3%*
Other, liquefied	*98,186*	*132,896*	*35.4%*
Coal	393,203	276,201	-29.8%
Sulphur	137,523	147,824	7.5%
Total Above	**36,202,620**	**30,478,829**	**-15.8%**
TOTAL ALL MINING	**36,446,117**	**30,534,264**	**-16.2%**

The majority of Alberta's mining exports went to the United States, consisting mostly of crude petroleum, natural gas and propane. Nearly 99% was imported by the United States, while the rest was imported primarily by Japan, Brazil, China and South Korea.

Manufacturing

Downturn in global manufacturing industry affects Alberta exports

The manufacturing sector's global recession and the high tech meltdown in 2001 caused Alberta's manufacturing exports to decline by 5.5% that year. Continued weakness in those sectors, combined with lower prices for chemicals, resulted in a further 7.2% drop in manufacturing exports in 2002. Manufacturing export volumes (rather than values) fell by between 2% and 3%.

The manufacturing sector accounted for 32% of all commodity exports in 2002. Even with the 2001 and 2002 declines this sector's exports were still 45% higher in 2002 than they were in 1997.

Of the 15 industries that comprise this sector, only four increased their export values compared to 2001. Significant gains occurred in primary metals (up 34%). Exports of computer and electronic products, mostly telecom equipment, declined 20%. Other industries with significant declines include electrical equipment (down 26%) and refined petroleum products (down 16%).

The chemical industry remained Alberta's largest sub-sector with exports of $3.4 billion, followed by food, feed and beverages with $2.8 billion and computer and electronic products with $2.1 billion. The other sub-sectors with exports in excess of $1 billion were paper and pulp ($1.5 billion), wood products ($1.3 billion) and machinery ($1.2 billion).

Manufacturing Industries	2001 ($ millions)	2002 ($ millions)	Percent Change
Chemicals	3,775.3	3,431.3	-9.1%
Computer & Electronic Products	2,612.1	2,092.4	-19.9%
Electrical Equipment, Appl. & Comp.	248.5	184.3	-25.9%
Fabricated Metal Products	345.3	335.1	-3.0%
Food, Feed, Beverages	3,026.8	2,849.5	-5.9%
Furniture & Allied Products	350.0	317.6	-9.3%
Machinery (excl. Electric/Transport)	1,273.7	1,237.3	-2.9%
Non-Metallic Mineral Products	148.5	141.7	-4.6%
Paper Products & Wood Pulp	1,577.4	1,496.5	-5.1%
Plastics & Rubber Products	243.6	258.7	6.2%
Primary Metal Products	451.4	603.0	33.6%
Refined Petroleum & Coal Products	627.2	528.2	-15.9%
Transportation Equipment	596.9	615.0	3.0%
Wood Products	1,306.5	1,316.5	0.8%
Other Manufacturing	150.0	118.9	-20.7%
TOTAL MANUFACTURING	**16,733.8**	**15,526.0**	**-7.2%**

The major manufactured commodity exports in 2002 were beef, wood pulp, telecom transmission apparatus, lumber, styrene and ethylene polymers. Collectively, these accounted for about one third of all manufactured products.

Exports of telecommunication equipment fell by about one quarter between 2001 and 2002. Even though the telecom sector's export value plummeted by

more than one half during the past two years, it is still more than 60% higher than the 1997 value, because of strong growth in the years prior to 2001.

The manufactured commodities with the strongest growth in 2002 compared to the previous year were:

- ethylene polymers (up $427 million, or 284%)
- line pipe for oil or gas pipelines (up $91 million, or 437%)
- unsaturated acyclic hydrocarbons (up $65 million, or 751%)

All of these commodities were exported primarily to the United States. China and Belgium also were significant customers for Alberta's ethylene polymers. Exports of oriented strand board (o.s.b.), nickel and oil and gas field equipment also increased sharply.

A total of $11.5 billion of manufactured commodities was imported by the United States, a decline of $1.2 billion or 9.5% from 2001, mainly because of much lower export volumes of telecom equipment and lower prices for chemicals. Because of the US' weak economy none of the sectors, except primary metals, showed strong growth. The largest three manufacturing sectors for Alberta to US export trade in 2002 were: chemicals ($2.8 billion), food, feed and beverages ($2.0 billion) and computer and electronic products ($1.6 billion).

The Asian countries of Japan ($660 million), China ($631 million), and South Korea ($361 million), were the next largest markets for goods manufactured in Alberta. Manufacturing exports to Japan were down 15%, as lower exports of beef and coal more than offset increases in nickel and cobalt. Exports to China increased 8%, because of higher wood pulp and ethylene polymer exports. South Korean imports of manufactured goods from Alberta also rose 8%, because of large increases in wood pulp and beef imports. Taiwan, another major market for Alberta's manufacturing sector, has increased its imports of telecom equipment sharply during the past four years. Overall, paper and pulp, chemicals, and food, feed and beverages were Alberta's largest manufacturing export sectors to Asia.

Alberta's largest European Union markets for manufactured goods were the United Kingdom ($136 million), Belgium ($112 million), the Netherlands ($106 million), Italy ($105 million), and France ($103 million). For Belgium, the U.K. and the Netherlands the largest manufacturing import was nickel, for Italy wood pulp, and for France telecom equipment.

Mexico's manufacturing imports from Alberta declined by 2% to $300 million, as a result of a reduction in beef imports. Smaller markets with significantly higher imports of manufactured goods include Australia (telecom equipment), Iran and Libya (oil and gas field equipment), and Singapore (telecom equipment and oil and gas field equipment).

Alberta's Major Manufacturing Exports	**2001 ($ '000)**	**2002 ($ '000)**	**Percent Change**

Forestry, including Wood, Paper and Allied Products

Strong growth in export volumes of forestry products...

Overall, forestry product exports totaled $2.8 billion in 2002, a drop of 2.4% over 2001. This decline was mainly the result of lower prices for lumber and newsprint, as export volumes increased by about 4%. Wood pulp, the sector's largest export, decreased 3.8% as a result of a slight drop in prices. The value of lumber shipments fell 4.8% as higher volumes failed to offset a decline in prices. Oriented strand board (o.s.b.) exports increased because of larger volumes, while lower prices caused newsprint shipments to decline.

Alberta's Major Forestry Exports
(includes Wood, Paper and Allied Products)

	2001 ($ '000)	2002 ($ '000)	Percent Change
Wood pulp	1,307,442	1,257,630	-3.8%
Lumber	698,904	665,977	-4.8%
Oriented strand board & waferboard	347,756	384,417	10.5%
Newsprint	195,288	167,828	-14.1%
Fibreboard	56,901	45,813	-19.5%
Builders' joinery and carpentry	44,588	42,890	-3.8%
Total Above	**2,650,879**	**2,564,555**	**-3.3%**
TOTAL ALL FORESTRY	**2,892,475**	**2,824,044**	**-2.4%**

The primary markets for wood pulp were the United States ($497 million), Japan ($193 million) and South Korea ($202 million). Pulp exports to the US and Japan fell by 10% and 7%, respectively, while South Korean imports rose 17%. O.s.b. was primarily imported by the United States, accounting for about 98% of the total.

The value of lumber exports fell by 4.8% in 2002, as a result of a 31% decline in lumber exports to Japan. The US, which accounts for more than 90% of Alberta lumber exports, decreased lumber imports by 4.0%, as lower prices more than offset strong volume growth.

Major markets for forestry products were the United States ($2.0 billion), Japan ($250 million) and South Korea ($205 million).

Chemicals

... and of petro-chemicals

The value of chemical exports decreased by 9.1% to $3.4 billion, as a result of lower prices. However, overall volumes increased by approximately 4%, with particularly strong growth for ethylene polymers, styrene and urea. Almost all major commodities had lower prices – the largest price declines were registered by anhydrous ammonia, styrene and polyethylene.

Ethylene polymers became Alberta's largest chemical export with a value of $579 million, as a result of a near quadrupling in volumes. The commodity's major market was the US, which accounted for $453 million or 78% of ethylene polymer exports. Polymer exports to China more than doubled to $56 million.

Styrene exports, all of which were destined for the US, advanced 10% to $506 million, as volumes increased by about one third. Exports of polyethylene declined by 56% in 2002 to $389 million, mostly because of lower volumes. Shipments to the US, the major market for Alberta polyethylene, also fell by 56%, while 2002 exports to China were only about one quarter of the 2001 export value.

Alberta's Major Chemicals Exports

	2001 ($ '000)	2002 ($ '000)	Percent Change
Polymers of ethylene, nes	150,328	577,625	284.2%
Styrene	461,567	506,144	9.7%
Polyethylene	893,890	388,734	-56.5%
Acyclic ethers (m.t.b.e.)	497,881	341,932	-31.3%
Ethylene glycol	444,407	341,369	-23.2%
Urea	244,688	273,030	11.6%
Anhydrous ammonia	183,092	142,589	-22.1%
Artificial filament tow	144,661	141,898	-1.9%
Ethylene-vinyl acetate copolymers	104,863	106,479	1.5%
Acyclic hydrocarbons, unsaturated	8,610	73,831	757.5%
Methanol	60,614	66,179	9.2%
Polyvinyl chloride	93,282	52,405	-43.8%
Total Above	**3,287,883**	**3,012,215**	**-8.4%**
TOTAL ALL CHEMICALS	**3,775,315**	**3,431,301**	**-9.1%**

Exports of acyclic ethers (methyl tertiary-butyl ether) dropped by 31% to $342 million, as both volumes and prices declined. The US is Alberta's only international market for these ethers. Exports of ethylene glycol to China, Alberta's largest market for this commodity, rose by 8% to $230 million. However, total ethylene glycol exports fell 23% to $341 million, as volumes to the US, South Korea and Taiwan dropped sharply.

Major markets for chemicals were the United States ($2.8 billion), China ($412 million), South Korea ($46 million) and Belgium ($32 million).

Computer and Electronic Products

Global high tech slump continues to affect exports of telecom equipment

Because of the global high tech slump, Alberta's exports by the computer and electronic products industry, mostly telecom equipment, fell by 20% in 2002 to $2.1 billion, from $2.6 billion in 2001 (and $4.5 billion in 2000). Despite the two sharp consecutive declines, Alberta's exports of computer and electronic equipment were still 62% higher in 2002, compared with 1997.

Exports of telephone apparatus fell by 29% to $1.4 billion, because of a 38% drop in US demand – exports to international markets other than the US rose by more than one third. Wireless communication equipment exports declined 19% to $300 million, as US imports fell by more than one third. Exports of navigational, measuring and control apparatus (e.g. surveying instruments and gas or smoke analysis apparatus) rose 45% to $308 million, because of increased US demand.

The United States accounted for $1.6 billion or 77% of Alberta's computer and electronic product exports. Other major destinations include Taiwan ($105 million), Hong Kong ($49 million), China ($46 million) and the UK ($43 million).

Alberta's Major Computer & Electronic Product Exports

	2001 ($ '000)	2002 ($ '000)	Percent Change
Telephone apparatus	1,916,851	1,351,304	-29.5%

Machinery

Machinery exports fall despite sharp rise in shipments to the Middle East

In 2002, exports of machinery fell by 2.9% to $1.2 billion, even though the demand for oil and gas field equipment remained strong. Exports to the US decreased 1.2% to $744 million, primarily because of reduced sales of pumps. Exports of machinery to the Middle East rose by more than one half, because of increased demand in Yemen ($38 million), Iran ($33 million) and the United Arab Emirates ($29 million), but exports to Russia plummeted by more than half to $27 million.

Exports of oil and gas field machinery, mainly boring and sinking machinery and parts thereof, increased 17% to $370 million, as a result of strong demand growth in Yemen, the United Arab Emirates, Iran and Singapore. Exports of other industrial machinery, much of which is used by the oil and gas sector, fell 3.3% to $196 million, because of large declines in Russia and Venezuela. Lower demand in the US, China and Venezuela caused exports of pumps and compressors, also mainly energy related, to drop by 7%.

The United States accounted for 60% of machinery exports. Other major markets include Yemen, the United Arab Emirates, Iran, Russia, Singapore, Mexico and Venezuela (each importing more than $20 million).

Alberta's Major Machinery Exports

	2001 ($ '000)	2002 ($ '000)	Percent Change

Alberta Exports by Region

The vast majority of Alberta exports are still going to the US

The United States (US) continued to be Alberta's largest market in 2002, with exports valued at $43.4 billion or 88.5% of total shipments. Asia represents Alberta's second largest regional market, capturing 6.4% of Alberta exports, followed by Western Europe (1.9%) and Central America (1.1%).

Alberta's Exports by Region

	2001 ($'000's)	% of Total	2002 ($'000's)	% of Total	% Change 2002/01
United States	50,633,125	89.0	43,445,471	88.5	-14.2
Asia	3,405,130	6.0	3,144,679	6.4	-7.6
Western Europe	993,269	1.7	924,042	1.9	-7.0

Nearly all regions reduced their Alberta imports in 2002...

With the exception of Oceania and Africa, every region reduced its imports of Alberta goods in 2002. Exports to the US fell 14%, mainly because of a sharp drop in natural gas prices during the first half of the year. Exports to regions outside the US dropped 9.6%, as severe drought conditions in Alberta resulted in much lower production and worldwide shipments of major agricultural commodities such as wheat, barley and canola. The largest declines came from South America, where Venezuela and Argentina were both suffering from deep recessions, and the Middle East, the center of escalating tensions in 2002.

... but results are mixed over the last five years

The five-year trend (1998-2002) shows Alberta exports climbing 58%, led by a 72% rise in US bound shipments – the largest increase of all regions. In contrast, exports to regions outside the US were almost unchanged (-1.2%), as large gains in Eastern Europe and Central America were unable to offset sizable declines in Western Europe, South America and Africa.

Alberta Exports by Region

The vast majority of Alberta exports are still going to the US

The United States (US) continued to be Alberta's largest market in 2002, with exports valued at $43.4 billion or 88.5% of total shipments. Asia represents Alberta's second largest regional market, capturing 6.4% of Alberta exports, followed by Western Europe (1.9%) and Central America (1.1%).

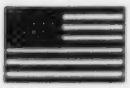
Nearly all regions reduced their Alberta imports in 2002...

With the exception of Oceania and Africa, every region reduced its imports of Alberta goods in 2002. Exports to the US fell 14%, mainly because of a sharp drop in natural gas prices during the first half of the year. Exports to regions outside the US dropped 9.6%, as severe drought conditions in Alberta resulted in much lower production and worldwide shipments of major agricultural commodities such as wheat, barley and canola. The largest declines came from South America, where Venezuela and Argentina were both suffering from deep recessions, and the Middle East, the center of escalating tensions in 2002.

... but results are mixed over the last five years

The five-year trend (1998-2002) shows Alberta exports climbing 58%, led by a 72% rise in US bound shipments – the largest increase of all regions. In contrast, exports to regions outside the US were almost unchanged (-1.2%), as large gains in Eastern Europe and Central America were unable to offset sizable declines in Western Europe, South America and Africa.

United States of America



"The US economy struggled throughout most of 2002 as it tried to dig itself out of the recession of 2001. But as the world's largest market, the US still provides vast opportunities for Alberta companies."

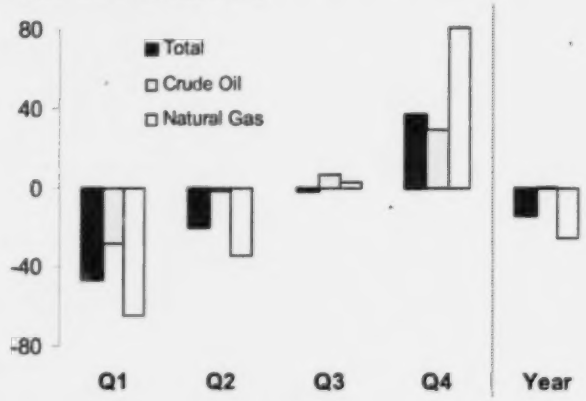
Wes Sawatzky, Alberta Portland Office

After a minor recession in 2001, the US economy recovered strongly during the first three quarters of 2002 but weakened again in the fourth quarter – ending the year with a 2.4% increase in real GDP. During the year, the US imported $43.4 billion from Alberta,14% less than in 2001.

Weaker natural gas prices in the first half cause US bound exports to fall in 2002...

With volumes of energy shipments almost unchanged, prices were to blame for the drop in US bound exports in 2002. Exports in the first quarter were especially weak (down 46%), almost entirely because of a 63% dive in natural gas prices and a 28% drop in oil prices. As natural gas and oil prices started to recover, so did total exports to the US; by the second half of the year, export growth turned positive.

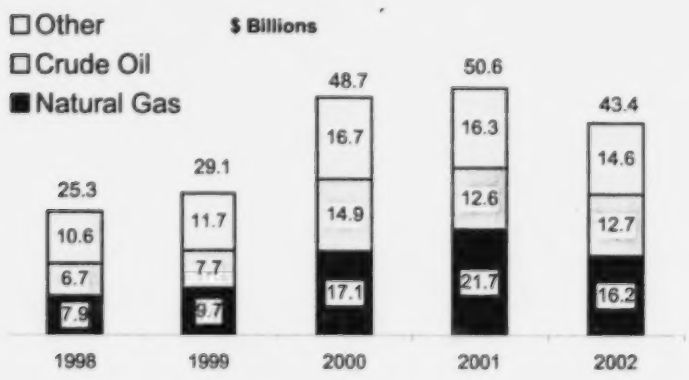
Alberta Exports to the US in 2002
(Y/Y % Change in Value)



...but exports to the US are still trending upward

Last year's export decline partly masks an upward trend in Alberta shipments to the US. Dominated by movements of crude oil and especially natural gas, Alberta has seen the value of its exports to the US grow by 72% over the last five years – the largest increase of all regions.

Alberta's Exports to the US



Through its rapid expansion into the US market, Alberta has been able to increase its share of Canadian exports to the country. Alberta's market share of Canadian exports to the US reached 15.4% in 2002, down slightly from 2001, but up from 12.3% in 1998.

Natural gas and crude oil still dominate Alberta exports to the US

The US buys more natural gas than any other commodity shipped from Alberta. About $16.2 billion worth of natural gas flowed from Alberta to the US in 2002, down 25% from the year prior. In 2002, energy exporters continued to benefit from the opening of the Alliance pipeline in December 2000, as volumes of gas shipped kept pace with 2001's record levels – although this was offset by lower prices. Natural gas has been the main force behind Alberta's exports to the US over the last five years as the province continues to take advantage of additional pipeline capacity and an overall upward trend in prices.

Alberta's next largest export to the US, crude oil, held fairly steady for the second straight year at $12.7 billion in 2002, with both volumes and prices largely unchanged.

In 2002, the largest gains among major exports to the US were posted by the following commodities:

- Polymers of ethylene became one of Alberta's largest exports to the US after soaring to $453 million from $86 million in 2001.
- Exports of line pipe for oil or gas pipelines grew to $112 million from only $21 million in 2001.
- Shipments of acyclic hydrocarbons jumped to $74 million from just $8.6 million the year prior.

Alberta telecom equipment manufacturers were again impacted by the global slowdown in the technology sector, with exports of electronic equipment (mostly telecom) falling 39% to $1.6 billion. The largest component, radio-telephone transmission equipment, slipped 38% to $665 million, while telephone switching equipment sank 45% to $231 million.

Top U.S. States

In this section, Alberta exports to major states in the U.S are discussed. Because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination, they are not included in the state export totals. The US Midwest region and California are the major markets for Alberta oil and gas. For a breakdown of exports by state including energy commodities refer to Appendix D.

"The Pacific Northwest was particularly battered during the American economic malaise of 2002. Exports to both Washington and Oregon were down. Montana, on the other hand, was the bright spot in the region with exports growing over thirty percent."

Wes Sawatzky, Alberta Portland Office

California and Texas account for nearly one-quarter of Alberta non-energy exports to the US

Excluding energy exports, Alberta's five largest trading partners in 2002 were:

- **California.** With exports valued at $1.6 billion in 2002 – down 11.6% from the year prior mainly because of lower organic chemical shipments – California maintained its position as Alberta's top US market. The province's largest export to the state is the gasoline additive, methyl tertiary-butyl ether (MTBE), valued at $311 million in 2002. Exports of telecom equipment, while still down sharply from its peak of $385 million in 2000, climbed 38% to $137 million in 2002. Boneless beef, oriented strand board and oil line pipe rounded off Alberta's next largest exports to California in 2002.

- **Texas.** This state imported $1.4 billion worth of Alberta goods in 2002, up 8% from 2001. For the third straight year, styrene was the largest export to Texas at $370 million, up 16% from 2001. In addition, about $242 million worth of equipment, mostly oil and gas field related, was shipped from Alberta to Texas in 2002, down 15% from the year before. Other major exports to the state include telecom equipment, lumber and beef.

- **Washington.** Exports to Washington fell 6.9% to $747 million in 2002. The largest commodity exported was live cattle, which climbed to $154 million during the year, but still down significantly from 1998 levels. Beef, oriented stranded board and plastics make up the other major Alberta exports to Washington.

- **Illinois** reduced its Alberta imports by 13% to $654 million in 2002, mainly as a result of much lower shipments of organic chemicals, including styrene and ethylene glycol. Furniture makes up the largest export to the region at $130 million, followed by organic chemicals – most notably styrene – and boneless beef.

- **Michigan** rose to become Alberta's fifth largest US market after experiencing a doubling of Alberta imports in 2002. Fueled by higher plastic shipments, especially polymers of ethylene, exports to Michigan reached $639 million. After plastics, the next largest exports are boneless beef, telecom equipment and chemical woodpulp.

Asia

The Asia Pacific region saw its economic growth improve to 2.5% in 2002, although the largest economy – Japan – remained in a recession. China, another major export market in the region, continued to expand at a rapid pace of 8% in 2002, driven by higher investment and net exports.

Japan and China import less from Alberta, causing exports to Asia to fall in 2002

Asia imported $3.1 billion worth of Alberta goods in 2002, down 7.6% from 2001. A drop in wheat, canola and coal exports were largely responsible for the decline as other major commodity exports, including forest products and telecom equipment, climbed during the year. For the second straight year, exports to Japan were down (-7.8%), while shipments to China fell for the first time since 1997, by 15% to $738 million.

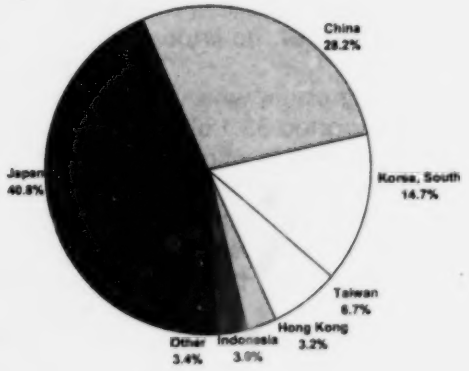
Alberta Exports to Asia in 2002

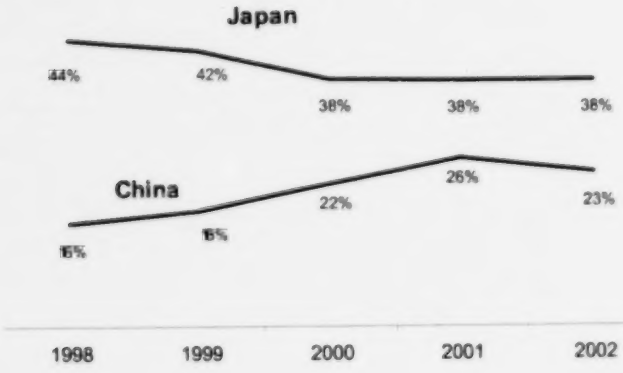


Total Exports: $3.1 Billion

Over the last five years, China has emerged into one of Alberta's fastest growing markets, with exports climbing 53%. While a sharp increase in ethylene glycol shipments explains most of this growth, other commodities, such as sulphur, artificial filament tow, ethylene polymers and woodpulp have also posted solid gains.

Over the same period, Alberta has seen its exports to Japan gradually fall, partly because of the continued weakness of the Japanese economy. However, with exports valued at $1.2 billion or 38% of Asia's total, the country remains Alberta's largest market in the region.

Share of Alberta's Exports to Asia - Japan and China



Japan

"The mounting pressure on Japan to open its markets to the rest of the world bodes well for Alberta exporters".

"In the long-run, demand for Alberta's agricultural products should remain strong given Japan's declining self-sufficiency in this sector."

Brad Klak, Alberta Japan Office

Japan continues as Asia's largest importer of Alberta goods despite sluggish demand

Still suffering from a decade long recession, the Japanese economy reduced its Alberta imports by 7.8% to $1.2 billion in 2002. Alberta exporters, faced with very weak Japanese demand for international goods, have seen the value of their shipments to the country shrink 12% over the last five years. This has brought down Japan's share of Alberta exports to Asia to 38% from 44% in 1998. Even over the last ten years exports to Japan have been flat, rising only 0.7%.

Canola continues to be Alberta's largest shipment to Japan. Valued at $218 million in 2002, exports of the commodity were up 15% during the year, but remained almost unchanged over the last five.

Non-coniferous (hardwood) chemical woodpulp ($116 million), non-durum wheat ($101 million) and coal ($96 million) followed as the next largest exports to Japan in 2002. Coal, in particular, has been putting downward pressure on Alberta shipments to Japan. Because of a combination of both lower prices and volumes, exports of coal have dropped 75% over the last five years, with last year's decline coming in at 25%.

China

"There are now over fifty Alberta companies with established offices or representatives in the China market. China's entry into the WTO and recent market reforms have created better transparency for foreign companies exporting to China."

David Wong, Alberta Hong Kong Office

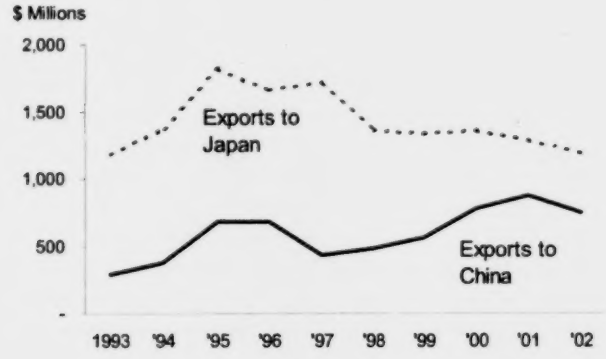
China imports less from Alberta in 2002, but still represents a very strong growth market.

Following four consecutive years of import growth, China reduced its Alberta imports by 15% in 2002. But with shipments valued at $738 million, the country continues to be Alberta's second largest market in the region and third largest overall. The country is also one of Alberta's fastest growing markets with exports up 53% over the last five years – a growth rate only exceeded by the US when comparing the province's ten largest markets. Over the last ten years, exports to China have escalated by more than 150%. Driving much of this growth over both periods have been huge increases in ethylene glycol shipments and, to a lesser extent, higher sulphur and woodpulp exports.

Making up about 30% of exports, ethylene glycol was Alberta's largest shipment to China in 2002. Exports of the commodity were up 8.2% to $230 million during the year on higher volumes alone. In every year since 1998, when ethylene glycol shipments totaled only $25 million, China has sharply increased its imports of the commodity.

Canola went from being the second largest export to China in 2001, with a value of $121 million, to being one of the smallest in 2002 at $5 million. In its place, exports of artificial filament, used for cigarette filters, rose to the second spot on exports of $98 million, up 8% during the year. The next largest export was semi chemical woodpulp, which more than doubled in value to $82 million – continuing to build on a five-year upward trend. Wheat and barley shipments were down sharply in 2002, while exports of sulphur saw a large increase.

Alberta exports to Japan and China have started to converge over the last ten years



South Korea

"Alberta-South Korea relations have strengthened from the Samsung and TRLabs agreement and Korea's continued corporate interest in investing in Alberta -- especially in the oil and gas, food and pharmaceutical sectors."

Cliff Wulff, Alberta South Korea Office

Exports to South Korea brought down by lower coal shipments

Exports to South Korea, Alberta's fourth largest market, declined for the second straight year, by 9.2% to $428 million, mainly as a result of lower coal shipments. Coal, the second largest export to the South Korea, was also largely responsible for the 21% decline in exports to the country over the last five years.

A combination of lower volumes and reduced prices led to a 56% drop in coal shipments to $46 million during 2002. Partially offsetting coal's decline were higher woodpulp, nickel and beef exports.

Valued at $175 million in 2002, non-coniferous (hardwood) chemical woodpulp was the largest export to the country. Exports of this commodity have been on the rise: up 36% in 2002 and by 71% since 1998. Ethylene glycol ($37 million), bone in beef ($26 million) and coniferous (softwood) chemical woodpulp ($14 million) made up the other top five exports to South Korea in 2002.

Taiwan

"WTO accession has intensified competition among Taiwan's retail industry. This represents a challenge and opportunity for Alberta exporters as companies, more than ever, seek new and marketable product ideas."

Li-an Chen, Alberta Taiwan Office

Telecom sales boost exports to Taiwan

Of all major Asian markets, Taiwan saw the largest increase in Alberta imports in 2002. Importing $268 million worth of Alberta goods, a 27% increase over 2001, Taiwan maintained its position as Alberta's sixth largest overall market. Fuelling most of this growth was a jump in telecom shipments, particularly that of telephone sets and electronic telephone parts.

Taiwan, a major telecom producer, is a large importer of electronics from Alberta. Shipments of electronic equipment, half of which are telephone sets, totaled $105 million in 2002, nearly doubling the value from the year prior. Weathering the technology meltdown, electronic equipment sales to Taiwan have jumped from just $8.9 million in 1998 and from almost nothing in 1995.

Other major exports to the country include hides and skins, valued at $31 million in 2002, coniferous (softwood) chemical woodpulp ($14 million) and coal ($13 million).

Hong Kong

"Weak domestic demand and persistent deflation continued to haunt the local consumer market, causing a dull performance for Alberta's agri-food exports, such as wheat. However, the large increase in manufactured exports, such as telephone equipment and electrical apparatus, reflect the market inroads of Alberta companies in the ICT sector."

Josephine Choi, Alberta Hong Kong Office

Higher telecom shipments offset by lower woodpulp and vegetable oil sales, leaving exports to Hong Kong largely unchanged

As Alberta's fifth largest market in Asia (11th overall), Hong Kong imported $110 million worth of Alberta goods in 2002, marginally more than the year before. Like Taiwan, Hong Kong is a major importer of computer and electronic products from Alberta, with the province supplying telephone sets, electronic parts and other telecom equipment. Demand for such equipment rose sharply in 2002: telephone sets sales more than doubled to $24 million, while electronic parts for telephones rose 21% to $13 million. Telecom sales have also been the driving force behind the 22% increase in Alberta's exports to Hong over the last five years.

However, 2002's rise in telecom exports was mainly offset by lower woodpulp shipments. In particular, exports of nonconiferous (hardwood) chemical woodpulp, the highest valued shipment of all commodities in 2001 at $15 million, plummeted to $2.9 million in 2002 on lower volumes alone. Vegetable oils, particularly canola oil, also put downward pressure on exports, dropping by 59% to $4.8 million.

Artificial filament tow ($13 million) and hides and skins ($10 million) topped off Alberta's top five major exports to Hong Kong in 2002.

Western Europe

Weak domestic demand, lower woodpulp prices result in fewer exports to Western Europe in 2002

Western Europe experienced a slowdown in economic activity in 2002, with many countries either falling into a recession or narrowly escaping one. Faced with declining business and consumer confidence, the Euro region suffered from weak domestic demand, recording GDP growth of only 1%. The German economy grew a dismal 0.2% and Italy by 0.4% while the economies of France and the United Kingdom expanded by more respectable - but still weak - rates of 1.2% and 1.6%.

In the backdrop of weak domestic demand, Alberta exports to the region declined 7% to $924 million, largely because of lower prices and shipped volumes of woodpulp (coniferous and non-coniferous). Of the largest countries in the region, Italy reduced its imports of Alberta goods the most – by 26%. However, not all European countries imported less from Alberta in 2002. Exports to Belgium and the United Kingdom increased by 8.5% and 3.5%, respectively.

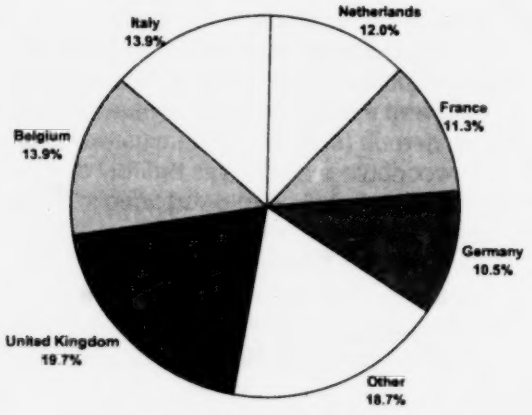
Over the last five years, Alberta exports to Western Europe have fallen by 14.2%, with large declines in Germany, the Netherlands, Italy and the United Kingdom. Reversing this trend are other major importers such as Belgium and especially France with sizable increases of 15% and 54%, respectively.

Alberta exports to Western Europe are fairly evenly distributed among the major markets. The United Kingdom, Alberta's largest market in the region, accounted for 20% of the province's exports in 2002, followed by Belgium and Italy, both at 14%. Since 1998, France has seen its share of Alberta exports to the region grow from 6.3% to 11%.

Alberta Exports to Western Europe in 2002

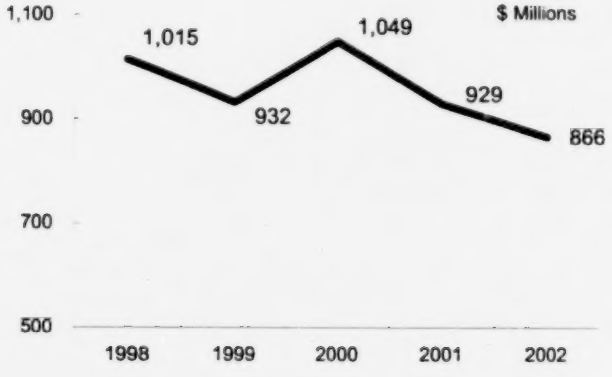


Total Exports: $924.0 Million

The European Union accounts for almost all exports to the region

Consisting of 15 member countries, the European Union (EU)[1] accounts for nearly all (94%) of Alberta's export to Western Europe. The region reduced its imports of Alberta goods by 6.8% to $866 million in 2002. Over the last five years, exports to the EU have dropped 15%.

Alberta Exports to the European Union were down in 2002



[1] Includes Belgium, Denmark, Germany, Greece, Spain, France, Ireland, Italy, Luxembourg, the Netherlands, Austria, Portugal, Finland, Sweden, United Kingdom

Germany

"Weak domestic demand stemming from the latest recession have hurt Alberta exports to Germany. But the German market, the largest in Europe, still presents an opportunity for Alberta companies."

Karin Teubert, Alberta Germany Office

Exports to Germany brought down by lower woodpulp sales

Impacted by a recession and falling domestic demand, Germany reduced its imports of international goods in 2002. Alberta exported $97 million worth of goods to Germany in 2002, down 13% from the year before and 28% from 1998 levels. Germany, which in 1995 was Alberta's largest European export market, watched its Alberta imports fall steadily in the mid to late 1990's, with woodpulp shipments experiencing the largest decline.

Totaling $51 million and accounting for just over one-half of total shipments, woodpulp dominates Alberta exports to Germany. Within this product group, semichemical woodpulp, valued at $22 million, is the largest commodity export, followed by nonconiferous (hardwood) chemical woodpulp ($18 million) and coniferous (softwood) chemical woodpulp ($12 million). Last year's 16% decline in woodpulp exports was entirely due to lower prices, while the 41% five year drop was both volume and price related.

Coal is also a major export to Germany, valued at $11 million in 2002 – nearly doubling the previous year's value. A combination of chemical, computer and electronics, machinery and transportation equipment make up most of the remaining exports to Germany.

Central America, Mexico and the Caribbean

The Central American region, which includes the Caribbean and Mexico, continued to be hurt by the US slowdown in 2002. With US domestic demand still weak, Mexico's exports grew only marginally. This, combined with a drop in investment activity, resulted in a mere 0.9% expansion in the Mexican economy. Weak, although recovering, tourism spending also affected the region in 2002.

Despite last year's decline, Central America represents a growing market for Alberta goods...

The Alberta drought, which lowered wheat and canola production, combined with weaker domestic demand for international goods translated into a 10% drop in provincial exports to the Central American region. However, with exports worth $539 million 2002, the region continued to be the province's fourth largest regional market.

Central America has been a growing market for Alberta goods. Since 1998, Alberta shipments to the region have risen by 30%, entirely because of increases in Mexico. Accounting for most of this growth has been a very high jump in beef exports.

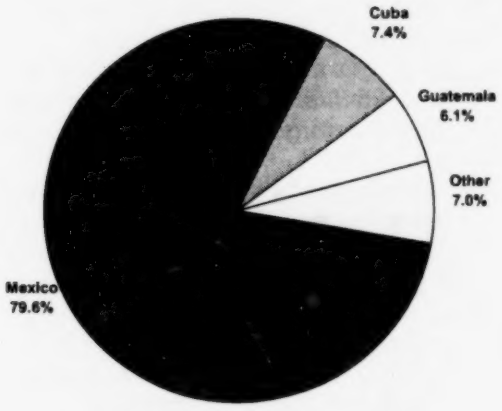
Alberta Exports to Central America in 2002



Total Exports: $538.7 Million

Mexico

... with Mexico driving most of this long-run growth

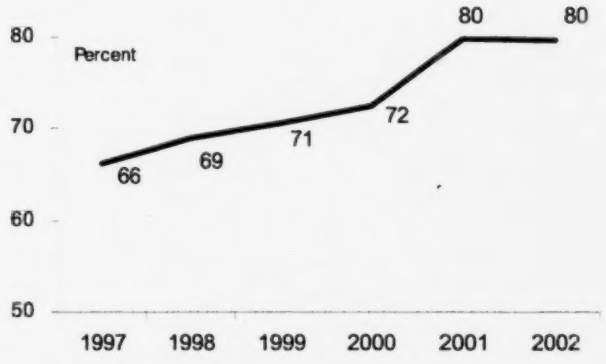
"As Alberta's second largest market for beef exports, Mexico continues to be of strategic importance for Alberta producers".

"While Mexico's constitution presents some challenges for firms in the energy industry, Alberta companies have enjoyed success in the Mexican oil and gas markets, earning the respect of government agencies across the country."

Lorena Patterson, Alberta Mexico Office

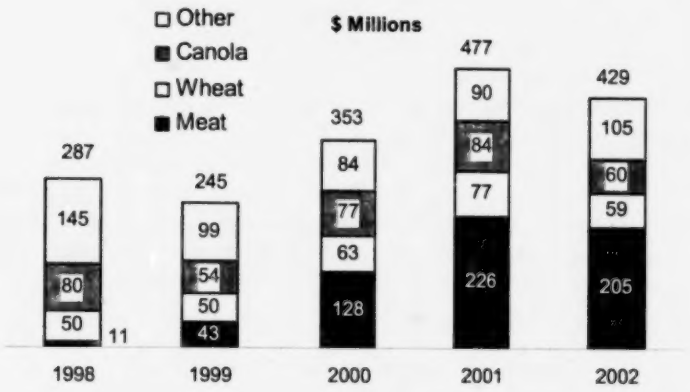
After two years of solid gains, Alberta's exports to Mexico fell by 10% to $428.6 million as a result of lower canola, wheat and boneless beef shipments. Despite 2002's decline, the country still accounted for 80% of exports to the region and continues to be one of Alberta's fastest growing international markets. Mexico has seen its share of Alberta exports to Central America steadily rise since 1997.

Mexico's share of Alberta exports to Central America has been rising



Valued at $159 million in 2002 or 37% of total exports, boneless beef is Alberta's top export to Mexico. Although exports of the commodity were down by 10% in 2002, they have increased sharply since 1998 when boneless beef exports totaled only $5 million.

Beef has been fueling Alberta's exports to Mexico



Other major exports to Mexico include canola, with shipments valued at $60 million in 2002, and wheat at $59 million. Exports of both commodities were down in 2002, with only wheat experiencing an increase over the last five years.

South America

In 2002, the South American region was in the second year of its worst recession in twenty years. Gripped by the crises in Argentina and Venezuela as well as the US slowdown, economic output in the region fell. Although growth turned positive by the fourth quarter, the region was still suffering from high inflation, rising interest rates and currencies that were depreciating against the US dollar.

Unstable South American economies import less from Alberta in 2002

Mainly because of its unstable and weak economic conditions, South America imported much less from Alberta in 2002. Led by declines in Venezuela and Argentina – the centers of regional tensions in 2002 – and Chile, shipments from Alberta fell by 22.5% to $324.1 million, the second consecutive annual decrease.

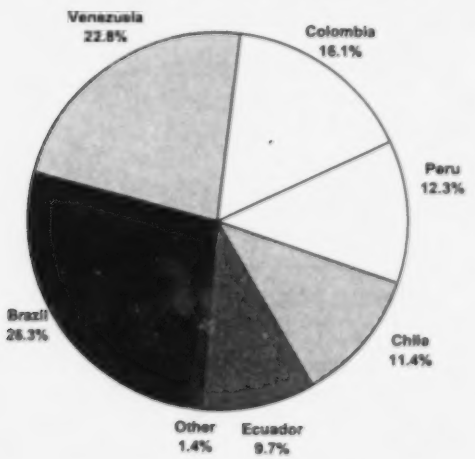
Alberta Exports to South America in 2002



Total Exports: $324.1 million

With the exceptions of Peru and Guyana, every South American country reduced its Alberta imports in 2002. Argentina, in particular, saw its imports fall 81% during the year. The country, affected by a series of recessions over the last five years, has been steadily reducing its international imports, although last year's decline was by far the largest.

Major exports to the region from Alberta include wheat, oil and gas field equipment and sulphur. Although export declines were widespread across most product groups in 2002, shipments of oil and gas field equipment and wheat were especially down during the year.

Over the last five years, Venezuela was one of the strongest growth markets in the region, with exports rising 40%. Exports to Peru and Chile are also up, by 29% and 14% respectively. However, shrinking markets dominate: total exports to the region were down 10% over this five-year period.

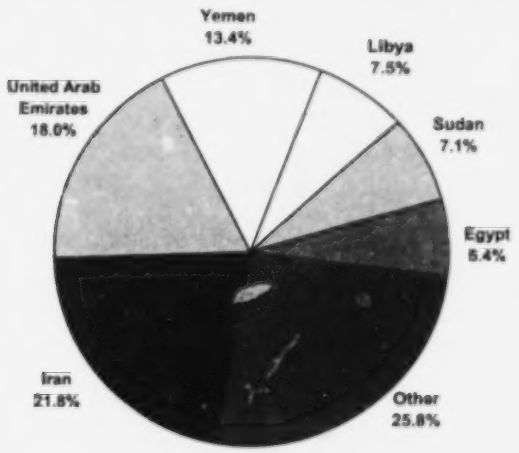
Middle East

The Middle Eastern economy, including North Africa, slowed to less than 3 percent growth in 2002, mainly because of declines in crude oil production – a result of OPEC quota cutbacks and instabilities in Iraq. The region, also hit by weak EU export markets and lower tourism revenues, saw Kuwait, Iraq and Israel enter into recessions during the year.

Alberta drought has major impact on 2002 exports to the Middle East

Plummeting wheat shipments, mainly a result of the Alberta drought, caused exports to the Middle East to drop 27% to $299 million in 2002 – the largest decline of all regions. The drop in wheat shipments was so large that it reduced wheat's share of total exports to the region from about one-half in 2001 to less than 10% in 2002. Egypt, for example, imported no wheat from Alberta last year even though its imports of the commodity totaled $19 million in 2001. Iran, the largest market in the region, saw its Alberta wheat imports shrink 91% to $10 million during the year.

Alberta Exports to the Middle East, 2002



Total Exports: $299.1 million

Iran accounted for a much smaller percentage of Alberta exports to the Middle East in 2002 as increases in oil and gas field equipment and trailers and semi-trailers were unable to offset the huge declines in wheat shipments. Exports to the country fell 57% from 2001 levels and 22% from 1998 levels.

Among other major markets in the region, Libya saw its Alberta imports more than triple because of oil and gas field equipment sales. This product group also boosted exports to the United Arab Emirates and Yemen. Lower wheat shipments reduced exports to Saudi Arabia, while Sudan's decline was broad-based across several commodities.

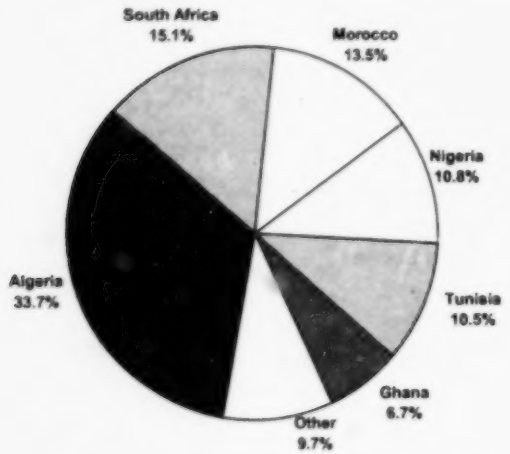
Africa

Although Africa[2] maintained fairly normal growth levels of about 2.5 to 3.5 percent in 2002, economies in the region continued to under perform due to several factors, including poor weather conditions in eastern and southern Africa, political problems in Nigeria and Zimbabwe, weak global demand and the HIV/AIDS pandemic. On a per capita basis, Africa's economic growth continued to be dismal, coming in at around 1% in 2002.

Exports to the Africa rise as wheat shipments hold steady

The Alberta drought did not have the same affect on Africa bound shipments in 2002. Accounting for almost two-thirds of Alberta's exports to Africa, wheat shipments remained almost unchanged as durum wheat sales rose to offset a decline in non-durum wheat. With wheat holding steady, higher barley and prefabricated building sales helped bring Alberta exports to the region up 2.1% to $218.3 million.

Alberta Exports to Africa in 2002



Total Exports: $218.3 million

Algeria maintained its position as Alberta's largest market in the region in 2002, importing more than twice as much as South Africa – the second largest market. Durum wheat helped push up shipments to Algeria by 51%, but pulled down exports to Morocco by 38%.

Over the last five years, Africa has been a low growth market for Alberta goods. Since 1998, exports to the region have fallen by 27%, mainly because of a sharp drop in sulphur shipments.

[2] Excludes some North African countries, which for this report are classified as Middle Eastern.

Eastern Europe

Strong domestic demand arising from income gains and falling interest rates helped keep economic growth high in the Eastern European region at about 4 percent. The slowdown in Western European markets impacted the region's exports much less than expected.

Eastern Europe imports less from Alberta in 2002...

As with most other regions, Eastern Europe, one of Alberta's fastest growing regional markets, imported less from Alberta in 2002. The region, which had posted sizable Alberta import gains over each of the previous two years, imported $117.3 million worth of Alberta goods, down 11% fr n 2001 because of lower equipment sales, mostly oil and gas field related.

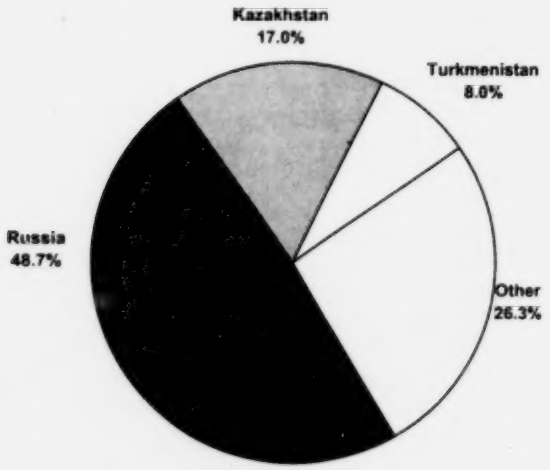
... but, over a longer period, the region has been a very high-growth export market because of gains in Russia

Even with last year's decline, exports to the region are up 30% over the last five years – the second highest growth after the US. While several commodities contributed to this increase, most of the growth came from exports of oil and gas field equipment, which now accounts for about 60% of total sales to the region.

Russia, the largest economy and Alberta's main market in the region, captures nearly 50% of the province's exports to Eastern Europe. It has also been the driving force behind higher exports to the region. While exports to Russia have risen 60% since 1998, exports to other Eastern European countries have climbed only 8%.

Alberta Exports to Eastern Europe, 2002



Total Exports: $117.3 million

Oceania

Higher exports posted in Alberta's smallest regional market in 2002

Oceania consists of Australia, New Zealand and other South Pacific countries. With imports valued at $96.8 million in 2002, Oceania is the province's smallest regional market.

Australia and New Zealand dominate this region, capturing 96% of Oceania's imports from Alberta. Because of higher shipments to Australia, exports to Oceania rose 4.9% – the highest increase among all regions.

As a result of fewer sales to New Zealand, Alberta has seen its shipments to Oceania fall in value by 47% over the last five years.

The largest exports to the region are telecom equipment and oil and gas field equipment.

Alberta International Trade Review 2002

Country Profiles

IMPORTANT DATA CHANGES IN 2002

The information available in the Country Profile section of this document is derived from 6 digit Harmonized System codes (HS Codes). While these codes are constantly being modified, in 2002 the HS Codes were changed dramatically to improve the classification of a number of major commodities. As a result when reviewing specific commodities in a number of country profiles the comparative value for the 2001 year will be zero as the specific code was created in the 2002 year.

For example, there was only one code (120500) for Rape or Colza seeds in the 2001 year. This code was then split into two new codes in 2002 to differentiate between low acid seeds and all other rape/colza seeds. The two new codes maintain the first four digits and can be compared over preceding periods, but comparing the commodity at the 6 digit level is more difficult as the commodity now includes a series of codes.

EXAMPLE

Code 120500	*Rape or colza seeds, whether or not broken*	**(2001)**
Code 120510	*Low erucic acid rape/colza seeds w/not broken*	**(2002)**
Code 120590	*Rape or colza seeds, whether or not broken, nes*	**(2002)**

If you have any specific commodities you wish to have more information on, please contact our office at the address provided here.

Exports from Alberta

HS Code	Commodity Description	Canada 2002	Alberta 2001	Alberta 2002
750210	Nickel unwrought, not alloyed	$491,811,911	$25,819,890	$47,903,480
390190	Polymers of ethylene nes, in primary forms	$33,615,607	$2,680,271	$30,374,257
470329	Chemical wood pulp, non-coniferous	$36,426,498	$24,597,557	$20,156,233
810520	Cobalt, unwrought, powders & mattes etc.	$11,708,867	$0	$6,587,847
100190	Wheat nes and meslin	$17,609,685	$5,155,365	$5,849,039
120400	Linseed, whether or not broken	$190,728,904	$3,363,672	$5,283,189
470500	Semi-chemical wood pulp	$9,353,001	$1,677,818	$2,785,797
120510	Canola or colza seeds	$4,213,120	$0	$1,363,503
270112	Bituminous coal	$15,810,824	$3,103,999	$1,277,542
750400	Powders and flakes, nickel	$2,025,310	$225,465	$1,245,196
100110	Durum wheat	$6,660,153	$2,437,022	$1,156,414
120750	Mustard seeds, whether or not broken	$18,847,602	$3,421,380	$1,019,782
550200	Artificial filament tow	$528,058	$8,167,082	$528,058
410150	Whole hides & skins, of a weight >16Kg Bovine/equine	$1,079,953	$0	$501,720
980600	Settler's personal and household effects	$4,682,904	$85,539	$421,500
	TOTAL (Commodities Listed Above)	**$845,102,397**	**$80,735,060**	**$126,453,557**
	TOTAL (All Commodities)	**$1,707,890,673**	**$118,628,346**	**$128,699,580**

Exports from Canada

HS Code	Commodity Description	Canada 2001	Canada 2002
710210	Diamonds, unsorted	$546,883,488	$491,811,911
120400	Linseed, whether or not broken	$121,432,306	$190,728,904
750210	Nickel unwrought, not alloyed	$99,989,128	$91,317,976
260800	Zinc ores and concentrates	$90,896,619	$69,461,340
711299	Waste and scrap of precious metal nes	$0	$48,693,770
470321	Chemical wood pulp, coniferous	$159,720,093	$41,171,922
470329	Chemical wood pulp, non-coniferous	$43,622,296	$36,426,498
390190	Polymers of ethylene nes, in primary forms	$8,398,027	$33,615,607
440710	Lumber, coniferous (softwood), 6 mm and thicker	$34,137,577	$33,375,797
760110	Aluminium unwrought, not alloyed	$0	$26,545,226
	TOTAL (Commodities Listed Above)	**$1,105,079,534**	**$1,063,148,951**
	TOTAL (All Commodities)	**$1,897,804,584**	**$1,707,890,673**

Appendices

Appendix A Standard Industrial Classification Codes (1980) included in Industry Groupings

Based on Statistics Canada's *Concordance between the Canadian Export Classification, 1988* and the *Standard Industrial Classification, 1980.*

Export Commodity Groupings	SIC Code	Industries
Agriculture		
Livestock	011	Livestock farms
	012	Other animal specialty farms
	021	Services incidental to livestock
Crops	013	Field crop farms
	014	Field crop combination farms
	015	Fruit & other vegetable farms
	016	Horticultural specialties
Logging and Forestry	04	Logging industry
	05	Forestry services industry
Mining (excluding crude petroleum, natural gas, and sulphur)	06	Mining industries
	08	Quarry and sand pit industries
	092	Service industries incidental to mining
Mining (crude petroleum, natural gas, liquefied petroleum gases and sulphur)	07	Crude petroleum and natural gas industries
	091	Service industries incidental to crude petroleum and natural gas
Manufacturing		
Food and Beverages	10	Food industries
	11	Beverage industries
Plastics	16	Plastic products industries
Wood Products	25	Wood industries
Furniture	26	Furniture and fixtures industries
Paper and Allied	27	Paper and allied products industries
Primary Metals	29	Primary metal industries
Fabricated Metals	30	Fabricated metal products industries
Machinery	31	Machinery industries
Transportation Equipment	32	Transportation equipment industries
Electrical/Electronic Equipment	33	Electrical and electronic products industries
Non-Metallic Mineral Products	35	Non-metallic mineral products industries
Refined Petroleum and Coal Products	36	Refined petroleum and coal products industries
Chemicals and Coal Products	37	Chemicals and chemical products industries
Other Manufacturing	03	Fishing products
	15	Rubber products industries
	17	Leather and allied products industries
	18	Primary textile industries
	19	Textile product industries
	24	Clothing industries
	39	Printing publishing and allied industries
		Other manufacturing industries
